Simple Click to Meet Functionality

4K

Up to Ultra HD Video Quality

Multiparty Meetings

Connects To Virtually Any Device, Over any Network

Integrated Directory Allows Dial By Name Simplicity

Encrypted Calls To Protect Privacy

Chorus, from VaaS-t, provides the functionality and flexibility of an installed video conferencing solution without any of the expense or headaches.

Gone are the expensive hardware and installation costs. Gone are the steep learning curves and support renewals you need to keep track of. Forget about software patches and upgrades to keep your system up-to-date and working at its best. Chorus takes care of all of this for you, with industry leading performance.

With a simple subscription to Chorus, you can have your own cloud-based videoconferencing infrastructure. You can manage this yourself, or let our team manage it for you.

Adaptable, expandable and simple to use.

Benefits for your IT

- Simple to deploy and scale
- Reduce capital costs to support meetings (rooms, desktop and mobile)
- Meet enterprise security standards with TLS, SRTP, H.235 and AES 128-bit encryption
- Standards based interoperability with H.323 and SIP videoconferencing systems

Benefits for End Users

- Click-to-connect simplicity
- Calendaring Support
- Up to 4K quality video and content
- Multi-Country dial-in support for voice only callers
- Simple ad hoc meeting creation
- View multiple simultaneous content shares between supported endpoints.

Using Vidyo Technology

- Connects via the VidyoRouter™ for industry leading multipoint performance with imperceptible latency
- Advanced SVC delivers unmatched quality, reliability and efficiency
- Dynamic adaptation technologies optimize media streams over variable networks and devices

Room, Desktop or Mobile

- Utilize hardware you already have or choose dedicated room systems
- Join meetings from the free VidyoMobile™ app
- Desktops join calls via a web browser, or using VidyoDesktop™ for the highest quality experience
- Leverage existing videoconferencing investment and enhance with VaaS-t advanced features.
